

Calculator Usage Agreement:

The use of a school-provided calculator is a privilege. Therefore those who use them should be willing to agree to follow certain guidelines when handling and using the calculators. These guidelines include, but are not limited to:

1. Use only the calculator assigned to you.
2. Pick up/return your calculator at the beginning or ending of class. (Do not disrupt class to get a calculator)
3. Never touch the calculator screen with anything.
4. Only one calculator is to be carried or used by any one student at any one time. Dropped calculators are often damaged. This means you are not to pick up or return a calculator for your neighbor.
5. Students are not allowed to share calculators.
6. After using the calculator, clear the memory.
7. If the “your batteries are low” screen appears, go ahead and use the calculator for that day. Notify the teacher only if the batteries are so low the calculator will not turn on.
8. Students do not change batteries in the graphing calculators, so there is NO reason the back cover should ever be removed.
9. Calculators are to be used for their intended purpose, and not to write messages (either bad or good).
10. Graphing calculators do not leave the classroom.
11. The classroom teacher has the right at all times to revoke a student’s calculator use privileges based on student behavior.
12. Based on student behavior/misbehavior, more rules may be added at any time.

Damaging a calculator will result in the student being charged for repairing or replacing the calculator. The graphing calculators cost approximately \$90 to replace.

I agree to the guidelines listed above and will treat the calculators with respect and responsibility.

Student Signature

Date

I understand that my child is offered the privilege of using a school-owned calculator. I agree to his/her use of the calculator and understand the responsibility of properly using the calculator is his/her responsibility.
